Geoderma 80 (1997) 463–464

GEODERMA

Contents Volume 80, 1997

Discussion Paper

Random sampling or geostatistical modelling? Choosing between design-based and model-based sampling strategies for soil (with Discussion)
D.J. Brus and J.J. de Gruijter 1
Discussion and Authors' reply 45

Research Papers

The forms of phosphorus in humic and fulvic acids of a toposequence of alpine soils in the northern Caucasus
M.I. Makarov, T.I. Malysheva, L. Haumaier, H.G. Alt and W. Zech 61
Distribution of colluvia and saprolites and their physical properties in a zero-order basin in Okinawa, southwestern Japan
Y. Ohnuki, R. Terazono, H. Ikuzawa, I. Hirata, K. Kanna and H. Utagawa 75
Modelling changes in cation composition of a soil after clearfelling a eucalypt forest in East Gippsland, Australia
B. Ludwig, P.K. Khanna, R.J. Raison and K. Jacobsen 95
Soil development at snail's pace: evidence from a 6 Ma soil chronosequence on basalt in north Queensland, Australia
B. Pillans 117
Factor analysis and direct optimization of the amounts and properties of volcanic soil constituents
E.L. Meijer and P. Buurman 129
Momentum of flow in soils assessed with TDR-moisture readings
P.F. Germann, L. Dipietro and V.P. Singh 153
Influence of well preparation on field-saturated hydraulic conductivity measured with the Guelph Permeameter
V. Bagarello 169
The influence of slope angle on final infiltration rate for interrill conditions
D.M. Fox, R.B. Bryan and A.G. Price 181
Sulfur isotope geochemistry of gypsiferous Aridisols from central Iran
H. Khademi, A.R. Mermut and H.R. Krouse 195

Book Reviews 211

Editorial: NMR in soil science
M.A. Hemminga and P. Buurman 221
Nuclear magnetic resonance, a simple introduction to the principles and applications
W.S. Veeman 225
^{13}C and ^{15}N NMR spectroscopy as a tool in soil organic matter studies
I. Kögel-Knabner 243
A practical guide to solid-state NMR of half-integer quadrupolar nuclei with some applications to disordered systems
A.P.M. Kentgens 271

NMR studies of soil, soil organic matter and nutrients: spectroscopy and imaging
E.W. Randall, N. Mahieu and G.I. Ivanova 307
Quantitative aspects of solid-state ^{13}C-NMR spectra of humic substances from soils of volcanic systems
P. Conte, A. Piccolo, B. Van Lagen, P. Buurman and P.A. de Jager 327
Quantitative differences in evaluating soil humic substances by liquid- and solid-state ^{13}C-NMR spectroscopy
P. Conte, A. Piccolo, B. van Lagen, P. Buurman and P.A. de Jager 339
The use of ^{29}Si MAS-NMR and Monte Carlo methods in the study of Al/Si ordering in silicates
M.T. Dove 353
Application of ^{31}P and ^{27}Al MAS NMR for phosphate speciation studies in soil and aluminium hydroxides: promises and constraints
R. Lookman, P. Grobet, R. Merckx and W.H. Van Riemsdijk 369
NMR methods for imaging of transport processes in micro-porous systems
H. Van As and D. van Dusschoten 389
Displacement imaging in porous media using the line scan NMR technique
D. van Dusschoten, J. van Noort and H. Van As 405
Observation of flow and transport processes in artificial porous media via magnetic resonance imaging in three dimensions
S. Oswald, W. Kinzelbach, A. Greiner and G. Brix 417
MR properties of water in saturated soils and resulting loss of MRI signal in water content detection at 2 tesla
L.D. Hall, M.H.G. Amin, E. Dougherty, M. Sanda, J. Votrubova, K.S. Richards, R.J. Chorley and M. Cislerova 431
The use of ^{129}Xe NMR spectroscopy for studying soils. A pilot study
P.C.M.M. Magusin, A. Bolz, K. Sperling and W.S. Veeman 449
